PD Dr. med. Stefan Markun
Allgemeine Innere Medizin
Institut für Hausarztmedizin
Universität und Universitätsspital Zürich

Stefan Markun is a researcher and teacher at the University Hospital Zurich and the ETH Zurich. He is engaged in teaching activities focusing on medical interviewing and methods of diagnostic reasoning. Stefan Markun is the scientific group leader of the FIRE project, which uses routine data from Swiss general practice for health services research and to improve quality of care.

Dr. med. Martin Perrig, MME
Allgemeine Innere Medizin
Universitätsklinik für Allgemeine Innere Medizin
Inselspital Bern

Martin Perrig has been actively involved for many years in clinical education and training in General Internal Medicine. A main focus of his work is the delivery of high-quality, patient-centered, and evidence-based care. He has extensive experience in mentoring and supporting talented residents and senior physicians in their professional development. He is also co-editor of a practical guide for early-career senior physicians.

Dr. med. Christine Roten, MME
Allgemeine Medizin
Universitätsklinik für Allgemeine Innere Medizin
Inselspital Bern

Christine Roten is a specialist in general internal medicine with additional certification in clinical emergency medicine. She has extensive experience in clinical teaching and medical research, particularly in physician education. Her work focuses on improving diagnostic accuracy and physician well-being. She is also a co-author of a guide for early-career senior physicians.

Dr. med. Guillaume Speierer
Allgemeine Innere Medizin
Universitätsklinik für Allgemeine Innere Medizin
Inselspital Bern

Guillaume Speierer is a resident in Internal Medicine at Inselgruppe, Bern, and product line owner responsible for stationary care, quality management, and medication within the Epic electronic health record system. Applies clinical expertise to implement new AI Tools in Epic, optimize digital workflows and patient safety. CEO and founder of MedSP, a startup developing a platform for interoperable diagnosis calculators, semi-automatically mapped to international standards.
